

EH&S policies – Environment, Health & Safety Policy

Offer innovative and sustainable solutions in the delivery of electric energy, generating value for our stakeholders in a way that avoids unfavorable impacts on the security and health of our employees, the environment or our communities.

To achieve this, we commit ourselves to:

- Eliminate work hazards and/or reduce work risks, seeking to reach the goal of “Zero accidents” and “Zero Harm”.
- Establish objectives and implement indicators aimed at preventing pollution and protecting the environment.
- Ensure compliance with all applicable environment, health and safety legislation as well as the requirements of our customers and shareholders.
- Apply continuous improvement principles to the operations management system.
- Promote the active participation of all interested parties to report any accident, incident, event or concern.
